DESCRIPTION OF PROJECT:

Construction of 249 properties on a sloping site with major retaining walls and earthworks at Bexhill-on-Sea, Kent. Contained within a larger strategic construction project.

OUR INVOLVEMENT:

We were contracted to provide a complete groundworks measure and budget for all substructure costs together with the identification of likely drainage and services routes. This was supplied along with an understanding of both the timeline and conditions surrounding the earthworks cut, fill and retaining wall construction.
